## DIRECTIONS FOR USE

Natures Grown Dairy Micro Premix is a high potency trace mineral and vitamin supplement designed for dairy cows requiring only these supplemental "micro" nutrients. Force feed at a rate of 1 to 2 oz. per head daily. The 2 oz. feeding level is generally recommended for early lactation cows and the 1 oz. feeding level for dairy cows in mid to late lactation.

For accurate ration balancing and feeding recommendations, analyze forages and utilize the Land O Lakes dairy ration balancing program.
